

**DRAFT-DRAFT-DRAFT
COMMITTEE NAME Mapping Committee**

Goal Reaching consensus on which Tongass watersheds should be conserved and which should allow timber harvest.

| Strategic Action | Participants responsible for completing action | Anticipated completion date |
|---|--|------------------------------------|
| Develop or acquire tools for mapping and tabulating various resources across the Tongass at regional, watershed, and sub-watershed scales. | Mapping Committee Member Dave Albert | September 2007 |
| Identify areas of the Tongass (at watershed and sub-watershed scales) with high biological, subsistence, and community/cultural values. | Roundtable stakeholders representing conservation, subsistence, and community interests. | November-December 2007 |
| Identify areas of the Tongass (at watershed and sub-watershed scales) with high timber values. | Roundtable stakeholders representing timber industry interests. | November-December 2007 |
| Using mapping and tabulation tools assist the Roundtable in evaluating various land allocation scenarios for balancing timber production lands with conservation and community/subsistence use lands. | Mapping committee prepare recommendations on various scenarios to be reviewed and approved by full Roundtable. | April-May 2008 |
